

# Residential disturbances

We all live in close vicinity to each other, so it may be that we sometimes hear neighbours or encounter their clutter.

## Normal residential sounds

Climbing stairs

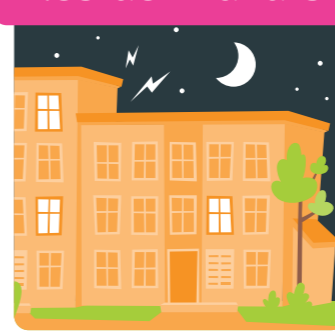

DIY jobs in the home, e.g. drilling or hammering

Closing doors

## Residential disturbances

Nightly sounds of life

Persistent noises

Left rubbish

## How do you deal with residential disturbances?

### 1 Engage in conversation

Engage in conversation with your neighbours. Stay calm and respectful and try to agree on what is acceptable.

### 2 Neighbourhood mediation

If talking does not help, you can engage neighbourhood mediation to reduce the disturbances.

### 3 Report the problem

As a last resort, you can submit a report on the Lefier website.

### 4 Police

Talking might not work if your neighbours are very confused or aggressive. If this is the case, call the police.

**A good relationship with your neighbours fosters greater understanding and reduces disturbances.**

**So talk with them more often!**

If you would like more information about residential disturbances or other rental issues, be sure to contact us.
